The attached Rate Schedules clearly identify a wide range of costs available for the various services offered by Neutral Tandem.

The Company's product falls into the middle range of these available costs. As Customers voluntarily agree to the Company's price structure on application for service and are free to discontinue service at any time, the Company's product price is consistent with a fair market value, or Customers would simply select another provider. Although we have a certain percentage of Customer turnovers, it is not inconsistent with industry norms.
